

## **Arena Lighting Upgrade news release**

Lighting up the 2022/2023 Season

The Municipal Climate Change Action Center (MCCAC) helped The Town of Beaverlodge achieve our upgrade and greenhouse gas reduction goals. Through the Recreation Energy Conservation (REC) program The Beaverlodge Arena reduced energy use by implementing a energy-saving project by assisting in funding the new lighting upgrade in the Arena.

Our municipality would like to thank the MCCAC for all their assistance, without them this project would have been possible.

Jeff Johnston, CAO, " Through the Recreation Energy Conservation Program and the Municipal Climate Change Action Centre we were able to improve efficiency and increase the energy conservation of our Arena. Also, the new lighting looks great! The time and effort spent will continue to benefit our community for many years."
